**STOCKVISION – REAL-TIME STOCK
MARKET ANALYSIS AND
PREDICTION TOOL**

NIVETHA.S (240701374)

JAITHA.K (240701205)

POOJA.D (240701385)

Functional Requirements Specification (FRS)

1. User shall be able to register an account
2. User shall be able to log in and log out
3. System shall authenticate users
4. User shall be able to view real-time stock prices
5. User shall be able to search stocks using symbol or name
6. System shall display historical stock data
7. System shall generate price trend charts
8. User shall be able to select date ranges for analysis
9. System shall perform stock price prediction
10. User shall be able to choose prediction duration
11. System shall display prediction results visually
12. System shall provide buy/sell/hold recommendations
13. User shall be able to add stocks to watchlist
14. User shall be able to remove stocks from watchlist
15. System shall send price alert notifications
16. User shall be able to set price thresholds
17. System shall update stock data automatically
18. User shall be able to compare multiple stocks
19. System shall display market news related to stocks
20. User shall be able to view portfolio performance
21. System shall calculate profit and loss
22. User shall allow data export (CSV/PDF)
23. Admin shall be able to manage stock data
24. Admin shall be able to manage user accounts
25. System shall log user activities

Non-Functional Requirements Specification (NFRS)

1. System shall provide real-time data with low latency
2. System response time shall be less than 2 seconds
3. System shall be highly secure
4. User data shall be encrypted
5. System shall support large number of concurrent users
6. Application shall be available 24×7
7. System shall be scalable for future expansion
8. Interface shall be user-friendly
9. System shall be reliable and fault tolerant
10. Data displayed shall be accurate and consistent
11. System shall support multiple devices
12. Application shall have high performance
13. System shall allow easy maintenance
14. System shall comply with financial data standards
15. System shall provide regular backups
